

NEW 2009 SENIOR TRANSPORTATION VEHICLE

Pictured in the photo is Blaire House of Tewksbury's new 2009 Senior Transportation vehicle. This state-of-the-art vehicle is air conditioned, cell phone equipped, handicapped accessible, with a large wheel chair ramp built into the bus. The bus is also equipped with four video cameras for safety purposes. Its interior is coated with a antimicrobial material, Nanocide. Nanocide that represents the next generation biocide for the coated fabrics industry. Test results for Nanocide have shown that 99.9% of resistant Staphylococcus germs that come in contact with it are killed within 30 minutes.
